

Tea Party Politics

by

George Everett

*Socialism steals one man's abundance to rob another man of his dignity, to benefit the politician. It is far more than intellectually dishonest. Freedom is the path of a successful healthy society. As a child I saw East German guards patrol their border, ready to shoot people fleeing to the West. Socialism is slavery, the rule of the elite. Our Constitution gives us independence & opportunity. We are facing an ideological crisis. Ironically in the name of Democracy we are being turned into a socialist society. Our liberty is threatened not from a foreign power with guns & bombs but from within. Politicians not only steal half our wealth but plunge our children into debt to pay for social programs. Obamacare, Welfare, Medicare, Social Security. We fund the arts, the schools, give billions to foreign governments & regulate everything even co2. None of this is constitutional. With the aid of the courts & the politician's most powerful weapon, the liberal media, our freedoms are being eroded. We need to elect people who understand the power of limited government. Politicians who will end socialized medicine, welfare, privatize our schools & social programs. Replace the IRS with a %10 flat tax at the cash register. Return our currency to the gold standard, balance the budget & pay off the debt. Energy independence is not only vital to our national security it's the surest means out of our economic crisis. End the reign of professional politicians with term limits. Teach our children American history not Social Studies explain that their inheritance is limited Constitutional government. Freedom! Return to the principals of our Founding Fathers.
God Bless America - Enjoy*

Respect

What's yours is yours, & mine is mine, the American way

Uncle Sam comes along, the rich must pay

what if I want to be rich some day & work real hard

if the poetry sells, they tax the bard

Bill of rights - antiquated

compassionate government is created

take from one, give to the other

it's stealing fool, it's Big Brother

Compassion is found in each individual heart

not in some fancy pants political upstart

government's the problem, not the solution

politicians destroy the Constitution

It's not a living document

there is no changing what is meant

government is authorized to protect

pack of thieves, no respect

Toodles

Ten percent, Mr President

that's all the government needs

anything more, we abhor

it leads to evil deeds

Land of the free, represent me

foreign ideals you serve

just a thief, causing grief

arrogance & nerve

Children unschooled, had us fooled

but there's a longing in our heart

we help the poor, are silent no more

you're not so smart

This welfare state, anything but great

in fact it's a drag

environment, enslavement

extremists wave the flag

You pretend, to be friend

of the Red White & Blue

freedom you hate, think Marx is great

Obama your gone, toodle-oo

Lemmings

*Ethnocentric attitudes are a boor
proud , cliquish , wanting more
for my people so misunderstood
the poor downtrodden in the hood
I'm American & don't have the time
to discriminate, which now is a crime
quotas give no one an edge
led like lemmings to the ledge
Near perfect system democracy
except for politicians we'd be free
take a look at the rest of the world
into confusion they've been hurled
Race politicians diminish us all
in the pulpit, preachers build a wall
it's an evil sick kind of vocation
people getting rich on separation
No exceptions not for anyone
playing favorites, must be undone
truly equal under the law
stop pretending there's some kind of flaw*

Hell With Rush

*It's an honor to serve, it should not be a profession
one term's enough, politician equals recession
betray the constitution, tho an oath they swore
destroy liberty, pretend to help the poor
Lovers of death, call it choice
no right to life, liberals rejoice
ripped from the womb, a million each year, God forbid
read my bible, recollect somewhere he did
Still their voice, silence em, steal the future blind
another amendment bites the dust, document signed
call it a fairness doctrine, Conservatism, hush
hell with the Great One, Laura & Sean,
especially to hell with Rush
Tell people what to think, confiscate property
silence all those radicals screaming freedom & liberty
control education, dumb em down, get em to sit on their buns
then take there guns*

Rush

*Opinion editorial unbiased perspective
quotes & quips free speech is effective
is Rush flooding the air waves with gloom & doom
for the rugged individualist there's little room*

*Look out America, it's time for the news
hold onto your seat prepare for the blues
first the death toll detailing each war
then in Hollywood it's Heidi the whore*

*They tell you what to think - then poll
vulgar mouthpiece of collective soul
the rabble given voice, like Rome
now done by survey, over the phone*

*My best advice don't believe all you hear
global warming conjuring up fear
we're rapidly becoming a socialist state
when it's self reliance, made us great*

Be Dust

*The past a jumbled haze of smiles, live now
God delights as you allow
joy is yours as you believe
be annoyed but never grieve*

*Representatives, Presidents, live & die
celebrate don't cry
look at today plan for tomorrow
but from our children do not borrow*

*Their future is in our hand
opportunity is meant to expand
politicians are errant
the inheritance comes from the parent*

*Stop legislating hope away
seriously it's time to pray
justify if you must
but it's our only trust & soon we be dust*

Banking Queen

*Free market economics is to blame
politician playing the game
common sense be damned
America is scammed*

*The press falls in line with absurdity
the free press meant to keeps us free
is now a socialist propaganda machine
for the Banking Queen*

*Barney & the boys are in charge
Fanny & Freddie's influence is large
unconstitutionally inflated beyond belief
creating social & economic grief*

*Make them loans or we'll close you down
evil, ugly, socialist clown
ruining the economy for political gain
treason ~ it's sick – insane*

What A Rush

*Desire for viewers or consumed with truth
silver tongued irony offend the uncouth
pompous & arrogant the court jesters role
then compassion reveals your soul*

*Words of absurdity like canvas & paint
colorful pictures a mischievous saint
endowed with talent on loan from God
an audience of millions laugh & applaud*

*Urbice of morality conservative - right
up beat & positive contagious delight
reminding America of her heritage & pride
the liberal media finally defied*

*Expressing clearly our point of view
concisely precisely speak what is true
inform & delight each head full of mush
teaching honesty, what a Rush*

Point of View

Knee-jerk honesty is hard to take

for a liberal, a lair, a fake

mustn't go too far with the word

almost nowhere - truth be heard

Thought Police, it's freedom they harm

"can't say that" screaming alarm

Grandpa, taught actions speak louder than words

liberal values are for the birds

People die, some before birth

America broken to save the earth

arrogant, ignorant, playing God

new age media just applaud

Remember the Rugged Individualist

that kind of spirit is sorely missed

ain't so much what you say, as what you do

old fashioned, conservative, point of view

Relax

Time is money, there it went

what matters most, how it's spent

Sam been spending mine

taking from my kids, ain't so fine

Spend the children's wealth

on welfare & socialized health

"American" - self sufficient - man of his word

silence heard

Alfred E Newman, Queenie, a Witch, a Clown

"America," almost killed her, sure slowed her down

but progressive powers decay

as believers pray

Time is money - money don't lie - relax

to govern means to limit, time for a "flat tax"

ten percent's enough for God my good man

& way more than enough for Uncle Sam

Our Fill

*The founding fathers would not understand
this isn't at all what they had planned
a political class, proud, elite
with graft holding onto their precious seat*

*Land of the free, home of the brave
the way I see it, already half slave
big governments always oppress
socialism, a horrible mess*

*Senators Congressmen, corrupt lobbyist
carpetbaggers, you wont be missed
career politicians - it's so wrong
serve one term & move along*

*Find a new breed, embrace liberty
a ten % flat tax again makes us free
amend the constitution no IRS
big government's a mess*

*A congress of simple folk
Washington an ugly joke
freedom is power the individual man
constitutional government's the plan*

*Limit power, easy to do
stop the reign of the privileged few
insane spending comes to an end
term limits - America will mend*

*Matters little, king or czar
politicians are what they are
president, prime minister, or premier
professional liars, can't believe what you hear*

*Stealing is what they know
deliberately make government grow
need a Tea Party to limit tax
path to freedom relax*

*What made America great was this
opportunity is bliss
politicians think they're in charge
their egos - much too large*

*What drives the engine of excellence
freedom sir - freedom - are you dense
best & brightest born of free will
you work for us, we've had our fill*

Hug A Tree

*Graduated in nineteen seventy
an idea was born, let's hug a tree
scientists said an ice age would come
over population, man's a bum
Ruin the planet with our dirty ways
heaven help us we shorten our days
Mother Nature had the last laugh
it's all fear mongering, an ugly gaff
Follow the money, who wields the power
many years planning, now is the hour
yes my friends we've all been had
Mother Nature ain't so bad
Ublcano, floods, fire & drought
nothing harms her why do you doubt
she's not fragile but dynamic alive
global warming, think we'll survive
Oil was created to burn
it's destiny is fire, listen & learn
it was created to burst into flame
government intervention is a money game
Part of creation just like the tree
it's not about green it's about free
politicians are in it for gain
oil's a blessing use your brain*

Al Gore

*Why listen to a lair & a boor
Mr CO₂ Al Gore
a thief stealing more & more
open your eyes know the score
tell you what's in store
poverty galore
your kids the ones you adore
will be dirt poor
if the Constitution we don't restore
on the Bible they swore
but socialists nail your feet to the floor
& steal your money - political whore
unworkable ideas explore
brothers I implore
it's too late to ignore
time to roar
politicians we deplore
they're all rotten to the core
want your spirits to soar
show liberals like Gore the door*

Again Ben

*A Republic, if you can keep it
embers cooling, fire barely lit
God given freedom, the promise, the prize
gives way to socialist lies*

*Jamestown should be History 101
social studies to you, isn't renaming fun
it makes socialist acceptable somehow
didn't work then & won't work now*

*Idealistic fools keep trying but it can't work
common man made victim, a patsy, a jerk
oh no, no it's about being fair
we steal your money because we care*

*Government doesn't care, never has, never will
politicians control, for power they'd kill
compassion's is found in each individual heart
we create music, athletics & art*

*Politicians don't make things to share
for power & reelection they care
Americans, most generous people you'll find
we're free, so we're able to be kind*

*Freedom isn't free, you don't just say thanks
we can loose our freedom to more than tanks
politicians appoint judges who legislate it away
they steal your freedom in paychecks each & every day*

*We're under assault open your eyes
con men & women telling lies
destroy the economy & take control
that most certainly is not governments role*

*The Constitution gives power to the individual man
big government & socialism was never the plan
limit government to ten percent - close em down
over 500 court jesters each one wearing a crown*

*Big government is theft
take from everyone till there's nothing left
then steal from children yet unborn
wake up America or mourn*

*Our children's liberty & rights are now at stake
Constitution's taken just about all she can take
killed by socialist lies & national debt, here we go again*

Ben

Eternally Poor

Crime is running rampant, citizens disarm

*Uncle Sam says guns are bad & you'll come to harm
government's growing, it should be yours & mine
listen to me brother, Waco was a sign*

Janet Reno's barbeque

*but it's ok it isn't you
wake up while you're free
torch some poor religious cult, next time it's you & me*

*All these milk toast do-gooders running Washington
should drive a truck, plow a field & not worry about my gun
you weren't so G D liberal with them Branch Davidians
burned em to hell, kids & all, abuse of power begins*

*America land of the free & home of the brave
300 kings regulate, with taxes they enslave
if they want your farm, it's EPA protected land
take a look at health care, slavery's being planned*

*We never let people bleed & die or ask them for a card
best health care in the world, be on your guard
power hungry liars, a socialist path
the evening news lulls us to sleep, should insight our wrath*

*Big brother is wearing a tie & a smile
been letting him steal for quite a while
time to begin a tax revolt, the limit ten percent
professional politicians is where freedom & money went*

*Upte em out of office all these fuzzy headed commie libs
daddy didn't fight the big one so we could listen to their fibs
now they steal from children I've had enough
Patriotic Americans are gonna start playing rough*

*We're gonna shut this government down, this welfare state
we're gonna keep our freedom, there ain't gonna be no debate
it's my money you're stealing & much, much more
you ain't gonna enslave my kids, make em eternally poor*

Not Your Slave

*Democracy building except at home
want freedom, time to roam*

*Russia might be your very best bet
they don't do bailouts, not yet*

*We're allowed to fail
capitalism the holy grail
government intervention is socialist
responsibility sorely missed*

*You have no right to what I earn
rot in hell I hope you burn
the greatest nation of all time
dead, politicians committed the crime*

*First they regulate
then legislate
assume the right to tax us to death
America draws her last breath*

*You don't represent me
in my heart of hearts I'm still free
a rugged individualist simple & brave
I'll never be your slave*

Moonbeam

*Go East young man go East
to the heartlands gathering feast
abundance & bounty there you will find
California is a grind*

*Socialists now run the golden state
bankrupt & broke she once was great
screaming liberalism with every breath
taxing the people to death*

*Values died on the West Coast
we're new age progressives they proudly boast
then steal openly from the common man
new age Marxists without a plan*

*If you seek the American dream
don't search the land of governor moonbeam
time to turn round on the road
that splotch of red & green was a jumping toad*

Vote

*Justice, wisdom, reason & right
the things you need in order to fight
a better world the ultimate goal
uplift each other, every soul*

*Freedom is always the quest
only then are all men blessed
each can seek his highest good
worship, play & livelihood*

*With freedom men excel
burdened with taxes - pure hell
limited government will always succeed
big government is corruption & greed*

*So if you're ready to fight
think that you've finally seen the light
small ideas promote
get a car full of people, go out to vote*

Cheers

*Obama! Obama! I hear the cheer
American Idol I sneer
charming, black & so clean
biggest phony I've ever seen*

*Immoral egomaniac stealing our wealth
make government responsible for our health
raise up the poor to bring you down
make us equal, a socialist clown*

*Charismatic leaders usually enslave
benevolence from cradle to grave
unchecked power of the lunatic
do-good liberals make us sick*

*God keep us from government control
liberty was our Founders goal
America just voted her freedom away
get on your knees & pray*

The Flower

Remember all those who died

*serving our country with courage & pride
 love of family, country, the Lord
 sacrifice remembered - you are adored*

*I place this flower on your grave
 once so alive, so young & brave
 freedom purchased with blood
 a constant flood*

*Freedom now stolen by the elite
 those unworthy to wash your feet
 godless deceivers of socialist ideal
 can't help but wonder how you feel*

*The constitution you swore to defend
 destroyed in a moment as laws are penned
 taxed beyond reason by the state
 your sacrifice vain, it may be too too late*

*Now we have massive debt
 the table before us sadly is set
 betrayed by those in power
 forgive great hero, all I have is this flower*

Ten Percent

*Ten percent's enough for God, it's enough for Uncle Sam
 politicians are taking more, it's nothing but a scam
 freedom means what's yours is yours, all you make
 representatives come along they take & take & take*

*Thieves in the dead of night, claiming they work for you
 intoxicated with power this evil's nothing new
 professional politicians - an ugly joke
 throw them all out of office, before we're totally broke*

*Our founding fathers never envisioned the modern elite
 the common man just peons sitting at their feet
 congressmen, senators, the commander in chief, one term
 & don't forget the justices that we forever confirm*

*Home of the brave & land of the free - not for long
 if you love America & want to keep her strong
 amend the constitution - limit government
 one term gentlemen & tax just ten percent*

Replant The Seed

*Duty is something we accept
part of becoming the adept
fidelity to God Country & Man
defending freedom is the plan*

*Honor is duty complete
fighting the fight of the truly elite
taking a stand to do what is right
struggling with all your might*

*The birthright of man is free will
when government enslaves never be still
stand up & speak the truth
educate the youth*

*They're being taught rights that don't exist
enter the socialist
freedom is all we want & need
replant the seed*

Compass & Square

*Allow one who's vulgar to offer advice
your mysteries are a pearl of great price
men of truth are needed today
time to do more than fellowship & pray*

*Men of virtue must stand up & lead
time to replant the much needed seed
of duty, honor, freedom & love
spread the blessings sent down from above*

*Reveal no secret, no pledge, no vow
but do get involved in the here & now
adhere to the principal of liberty
in the home of the brave & land of the free*

*Your compass & square are ever true
the gift of building is given few
this old house is in need of repair
step forward all ye good men who care*

Heart

*Provocative fools are destroying the nation
socialist ideologues offering salvation
capitalist pigs must be put in their place
the finest Americans made a disgrace*

*But liberals feel your pain
working class heroes are insane
only losers work for a wage
a job is nothing but a cage*

*You have a right to shelter & food
the rich are thieves, strange attitude
time to get even, social justice the cry
the lazy & stupid delight in the lie*

*Independence & freedom made us great
it wasn't God, it wasn't fate
liberty is what sets us apart
liberals rip out Americas heart*

Utopia

*You had utopia but wanted change
preaching compassion, how strange
freedom is the ultimate goal
forced equality steals your soul*

*I need to be free to prosper & fail
take a chance, unhindered set sail
choose my own path to success
your kind of fair will not bless*

*Social programs make us poor
with independence spirits soar
a hungry man has drive
he's highly motivated to thrive*

*But give a man all he needs
he won't bother to plant the seeds
for a better life & excel
preach utopia & create hell*

The Hole

*The Empire State Building was built in a year
take a look at ground zero shed a tear
the twin towers should have been immediately rebuilt
our leaders are suffering some sick kind of guilt*

*December 7th a day of infamy
the Japanese would deal with the land of the free
we were motivated to avenge the wrong
America, so proud & strong*

*In Manhattan today we have scorched ground
nine years later, weakness is found
we've lost our will & our pride
by third world terrorists defied*

*There was a time we'd have answered the call
defeated our enemies, stood proud & tall
we honor our dead with a hole, where strong towers stood
& discuss locating a mosque in the neighborhood*

Ground Zero Imam

*Ground zero imam I'm confused
a mosque built on body parts, can this be excused
dead infidels defile the ground
their broken bodies surely confound*

*How can you pray with their blood at hand
unless perhaps it's what you planned
no good can come of defiling the dead
gentle imam you've lost your head*

*Tempting fate is foolish you see
the spirits of the dead must be set free
not chained in the walls of your "holy" place
you make of your mosque an ugly disgrace*

*A prison for ghosts is what you build
no rest for the innocents so cruelly killed
trust me good imam just walk away
you're tempting God, get on your rug & pray*

Nine Eleven

*We honor the dead of Nine Eleven - with ground zero
then discuss building a mosque to honor each hero
which heroes do we honor my friend, are we insane
fire fighters & policemen - or those flying the plane*

*They hijacked planes - not a religion that day
screaming allah akbar - it's how they pray
discuss honoring their dead, where innocents lie
amid the flames & bodies falling through the sky*

*Read the koran, you'll understand, why the towers fell
kill the Jew & Christian infidel, or go straight to hell
fatwa's the burning thread uniting the faithful my son
achieve glory by killing - with bomb, plane, or gun*

*Freedom to worship means nothing if worshipers aren't free
enslaving minds with sharia law, they dare not disagree
America a muslim nation, lovely burqa my dear
doubt me - with Mayor Blomberg that day is here*

Political Mind

*I'll never understand the political mind, or lack thereof
some of these megalomaniacs, think they're sent from above
the direction of their origin, I assure you is below
they have much in common with your average gigolo*

*Really believe they know what you need, egomaniacs
eagerly regulate, blatant their attacks
sick with lust & power, freedom is what they hate
pretending to be reasonable, as evil they debate*

*Equality freedom & fairness, they cry
then tax you while living & when you die
they have nothing to offer the world, nothing to give
sad small miserable people, who don't know how to live*

*Desperate for adulation as they tax your every breath
it sometimes seems there's no escape Lord not even death
want you morons off my back, out of my kids piggy bank
if they ever behaved like you, child abuse, I'd spank*

They're Socialist

How will you be remembered, traitors for a cause

*all that's left is silence no angry voices, certainly no applause
your every act destruction killing the greatest of dreams
freedom honor & glory, replaced with socialist schemes*

Politicians loathe the common man, power is the goal

*they talk about compassion but elitist seeks control
they know what's best for you & would rather see you dead
than making your own decisions, an idea they simply dread*

The individual, unimportant, an agenda they pursue

*freedom a useless concept, capitalism is nothing new
government must give everyone, everything they need
equality, fairness, uniformity, Satan's seed*

Free will is God's greatest gift, representatives take it away

*they pretend to be spiritual, but we know they never pray
generosity flows from each human heart, not the moralist*

*Democrats aren't kind, patriotic or charitable,
they're socialist*

Choice

Change is good I'm often told

*someone new turning lead into gold
change will happen anyway
the question is the price you pay*

Better to choose greater choice

*give liberty & freedom voice
don't want your government hand me down
turns a good man into a socialist clown*

You preach class warfare - share the wealth

*claim everyone has a right to good health
but we're only equal under the law
socialism has a flaw*

It doesn't work, never has never will

*just an excuse to enslave & kill
lovers of death pretend to be wise
all the while feeding us lies*

You steal from us all not just the rich

*teach the poor to complain make sure they bitch
rather than stake claim to the American dream
change you can believe in, same old socialist scheme*

City Inspectors

*City inspectors are a farce
an unconstitutional pain in the arse
regulations used to harass
tell you where to stick it but I have class*

*Safety inspectors I might understand
but pretend firemen now reprimand
saw one who couldn't save a cat
he'd break the ladder he was so fat*

*Four hundred lbs, a badge & blue suite
must tell you it did not compute
I was embarrassed for my city & state
real fireman it must humiliate*

*Someone will eventually sue you I'm sure
a group of citizens who can no longer endure
you interference in their lives
friendly North Las Vegas hardly applies*

Perfect

*Man isn't perfect we see it all the time
politicians prove it, they're immersed in crime
stealing trillions, generational debt
they smile & feel absolutely no regret*

*We the People so proud & free
are just pawns don't you see
lies & laws to break our backs
unconstitutional all this tax*

*More & more power they legislate
light bulbs & toilets they regulate
time to stop them they're out of control
put them in jail without parole*

*They crashed our markets deliberately
then bailed out the banks an "emergency"
the capitalist pig employing you may be a thief
but nothing like politicians
who cause immeasurable grief*

Reorganize

It's OK to organize

*but union bosses are eying the prize
time to take the prize away
follow the money the old cliché*

*Unions no longer represent labor
it's all about political favor
power prestige - be a big wheel
as you steal*

*Union leaders are like syndicate thugs
prostitution gambling labor & drugs
the UAW killed the trade
now in Japan the best cars are made*

*American ingenuity died
union bosses weren't on your side
take a look at your pay stub, Bub
you don't get one - that's the rub*

*Open your eyes
time to reorganize*

*unions, a job killing ruse
just stop collecting dues*

Tea Party

Where's the harbor, give me some tea

*America the land of the free
taxes enslave - regulation & law
unconstitutional, I'm in awe*

*An oath they swear, every one
to the constitution, just for fun
it limits their power, can't have that
representative, polecat*

*Something smells Senator
you hate the poor
& you sure as heck don't represent me
where's the tea*

*I've been called glib & a smartie
my fellow Americans, your invited to a tea party
revolution - because of a %3 tax
amend the constitution , ten percent max*

John Galt

Obama's resurrecting John Galt

*had to happen eventually, many are at fault
top of the list ~ her majesty the queen*

I'm Frank about who killed the green

Bankrupted banking, Fanny & Freddie

*treasonous lies who was ready
trillions later generational debt
that's what we get*

Government confiscates wealth

goodbye savings, hello health

*make all dependent, stifle free speech
liberal thinkers can't do, but teach*

Factories have started to die

*insane regulations the owners cry
taxes unions, restrictions, fill out the form
close or conform*

Government intrudes ruthlessly

*just when you all thought you were free
life, liberty, pursuit of happiness, never mind
fundamental change, America redesigned*

Our greatest gift walks away

*no tears no time to pray
when what you make, belongs to all
ask John Galt, civilization will fall*

Once Again

Your right to liberty is divine, from God

not some vassal, your free to trod

any path chosen by you

freedom is precious & new

Liberals want to give it away

socialism, no wonder we pray

churches have always fed the poor

government programs just open the door

Uncle Sam's tilting the field

wake up America or our fate is sealed

fatherless families from sea to shining sea

politicians couldn't just let it be

We the People provide housing & medical care

living off food stamps without a care

sacrifice only their values & pride

social programs begin the slide

Big government can only oppress

bureaucrats create the mess

remember taxation without representation

time once again to free the nation

Progressive Slavery

*Fools say reparations need to be made
damn sure the Reverend be first to get paid
when my great great grandfather died for the cause
my whole family paid for archaic flaws*

*I owe my black brothers nothing more than respect
it's what they owe me, pause & reflect
how dare anyone demand what is mine
it's my freedom you undermine*

*Where is the slave I see no chain
except in you heart use your brain
most men abhor what occurred
the slaves were freed or hadn't you heard*

*We even elected a black president
though he hates our country it's evident
screw freedom, the independent, especially the capitalist
modern day slavery ~ the progressive socialist*

The Cancer

*America for you I pray
been loosing hope, little more each day
in many ways been lending a hand
but patriotism it seems has been banned*

*The president has no pride
he's only in it for the ride
spending a billion at the Taj Mahal
all apologetic, this man is small*

*Can the American spirit survive
home of free where people thrive
we've never been threatened like this before
bankrupting our country making us poor*

*Your idea of change is trillions in debt
our children's birthright you have spent
irresponsible malicious insane
destruction, is Obama's gain*

*Socialism we fought through the years
yet you bring it here you bring us tears
an evil cancer bringing death
I'm praying with every breath*

Blind

*Used to wonder why Justice was blind
thank God she can't see the wheels that grind
courts seldom consider truth
primitive, uncouth*

*Lifeless machine, no mercy or soul
sucking up riches, your precious goal
acting professional, just a paper scam
usually some poor slob, gets sent to the slam*

*Your Honor, the office we salute
silently hoping he thinks you're cute
any advantage in this perverse affair
it may be real but it ain't fair*

*Pick any issue & its opposite side
debate & question, pretend no one lied
the best lawyers are the best liars you'll find
Justice is deaf as well as blind*

Raid

*Freedom & liberty are precious friend
ignore the media America can mend
don't be sucked in by each cynical quote
study the issues & vote*

*Amendments to end debt & perks
term limits on congress, bunch of jerks
power mongers, not leaders but hacks
to cure the economy a flat ten percent tax*

*Tired of the powerful using the press
for social experiments I must confess
individual liberty made us great
something socialists simply hate*

*Washington has limited, specific, enumerated power
return to our founding, this is the hour
army, borders & facilitate trade
that's all, come down on government like a raid*

Come Home

*Freedom's the only just cause
man can be evil, so we have laws
to those who fight we owe a great debt
those who die let no one forget*

*For you who return an end to strife
now is the time to enjoy your life
you've earned it with honor & duty
get a good job, marry your cutie*

*Liberty is precious for all
thank you so much you answered the call
all your conflict is in the past
find peace & make it last*

*You've come home to family & friends
the world no longer on you depends
because of you she has better things in store
you did your part to end the war*

*Hold your head up with pride
you know what's owed to those who died
enjoy liberty & live well
those who protest can go to hell*

City Haul

*Laughing right out loud cause you think you're so damn free
proud, tall & arrogant you're blind to what I see
the Federal government wont challenge the state
state wont challenge city, not in any debate*

*So my fellow Americans when the city comes for you
you'll find the constitution's not interpreted for the few
individuals do not count when it comes to the rights of all
everyone using power to manipulate your fall*

*I've been to my City Council & it fills me with disgust
they don't serve the people they prostitute our trust
who cares what kind of chair I use to enjoy some shade
or if you own a car lot only new cars make the grade*

*Perhaps we should examine how much they interfere
goodbye Constitution, another ordinance is here
see the city work & who yields the power
moron megalomaniacs, America's dream gone sour*

Afford

*In Germany they used to shoot the poor
for going thru the trash
in America we keep them out
because we might loose some cash*

*The Aryan race felt no pity
the peasants are better off dead
but what is it we're doing
withholding stale bread*

*In your pride & arrogance
are you better than the poor
without your even knowing it
declaring war*

*The one you destroy is yourself
you turn away your Lord
giving even your garbage
you simply can not afford*

Suffragettes

*Suffragettes procured the right to vote
her modern day counter part sows wild oat
it's not about wages & getting ahead
now it's abortion, an issue pregnant & dead*

*The man is responsible if a child is born
but if mom don't want it there ain't no time to mourn
just a nonviable tissue mass, an inconvenience to dismiss
kill your child without sorrow baby don't get no kiss*

Jerk

*The problem is simple who fights the war
decision makers or sons of the poor
politicians talk they don't die
their profession is to lie*

*If they put a uniform on your back
it may be you who's under attack
willing to spill blood on the battlefield
to insure corporate interests & guarantee yield*

*When the time arrives to protect my land
reluctantly I'll raise my hand
communism failed it doesn't work
fight your own war, jerk*

Rules

*What makes your blood boil, what seems an outrage
take a look at the players their costumes the stage
anger must be directed at evil my friend
people are causing the rules to bend*

*Murder is final the most vile crime
killers are doing little or no time
you'll make the news if you kiss in first grade
a sexual predator suddenly made*

*The victims are screaming silent alone
the loss to loved ones can not be known
turn a deaf ear to pain, look around
a less disturbing evil can be found*

*Make it ethnic or gender, us against them
find a bull dike or some silly fem
stage some ugly angry attack
revenge on principal for a Latino or Black*

*Conservatives are not the foe
violent people are causing woe
politicians & press the new criminal class
& they're giving murderers a pass*

Your Mess

*America home of the brave land of the free
welfare checks & health care for you & me
individuals don't matter it's the common good
can't help but wonder is freedom misunderstood*

*Taxes the problem money enslaves
they tax us here & in our graves
bureaucrats rule claiming they know best
they lack compassion power's the quest*

*Politicians are stealing the wealth of the land
but We the People are taking a stand
we own America not you socialist fools
time you started following the rules*

*It's our money not yours are you having fun
we're going to make changes in Washington
you steal from our children brazen & bold
your kind of leadership has gotten old*

*A balanced budget will end the theft
term limits will quiet the left
then close down the IRS
a flat ten percent is all you need*

We the People will clean up your mess

Memorial Day

*What do we celebrate on memorial day
who do we honor as we pray
freedom is paid for by the brave
fighting for honor & to free the slave*

*Cherish their gift & examine the price
their suffering ends in paradise
continue the work they've begun
improve the world & have fun*

Oprah's Great

*Give me liberty or give me death
the patriots cry with their final breath
today's attitude is what the heck
just give me a welfare check*

*Opportunity's nice but Oprah's great
the ball games on, freedom can wait
the politician will take care of me
I don't have to, I'm free*

Rights

*Government has no rights not the nation, city, or state
just a responsibility to the lowly & the great
the Constitution confers rights, on people like you & me
it limits the power of government to protect & keep us free*

*Lately I see an awakening, Americans are in control
everywhere good people assuming the proper role
taking back their government our heritage is at stake
for too long sleeping, suddenly we're awake*

*So much money wasted, some used to oppress
a tea party revolution is having much success
it's in Washington today, your home town tomorrow
the little city big boys are also causing sorrow*

*Government is out of control alright
are you ready for the fight
if you believe in people's rights, run for office friend
get rid of corrupt egomaniacs, America will mend*

Power

*Government has way to much power
power belongs to the people, this is the hour
career politicians want to enslave
a nanny state from cradle to grave*

*The elite think they know what's best
pseudo-intellectuals with a socialist quest
they really believe they should rule
common man, common sense vs the fool*

*Real leaders get out of the way
they certainly don't demand half of your pay
they let experts run business & thrive
individual freedom keeps us strong & alive*

*We don't need leaders to take control
it's un-American it isn't their role
their job is our liberty beginning to end
you care way too much for us, it simply must end*

Bottom Line

*Businessmen look at the bottom line
they don't make excuses, blame others & whine
they compete in a market that used to be free
now it's regulation & government decree*

*Rules are made by ignorant men
creating bad law with the stroke of a pen
restricting those who employ & produce
then tax them to death, pure abuse*

*Why does the government tax oil & coal
is that really the politicians role
destroying the industry all Americans need
ironically screaming "look at the greed"*

*The politician's lust for power is beyond belief
smiling diplomatically & causing grief
the bottom line makes the world turn
get out of the way is what you need to learn*

Steadfast

*Belief affects us in the here & now
reality dependent on what you allow
leaders are supposed to work for you
but sadly that awareness is given few*

*Most have an agenda a socialist dream
they speak no truth they only scheme
they smile seductively as the lie in your face
put pretenders in their place*

*Take control at the ballot box
freedom's at stake the paradox
choice is taken from you by choice
you have the power use your voice*

*Professional politicians are in control
eliminating them must be the goal
or your freedom's a thing of the past
now is the time to be steadfast*

Court

*Bigger is better most of the time
except in politics, government or crime
which seem to be the very same thing
America did you really elect a king*

*You've elected a queen or two
I think it's time for something new
we've had enough medieval court
jousting really isn't sport*

*Jesters that's what I see
fools who don't understand we're free
you work at our pleasure, we have the vote
there is no castle, no dragon, no moat*

*Bloated egos create bloated debt
we're on to you & won't forget
time for a diet time to slim down
nobody likes an ugly fat clown*

Us

Five hundred Court Jesters, vs tea party protesters

the fight is on

American ideals, vs back room deals

tired of the con

Constitutional law, vs Socialist flaw

time to choose

thrive, vs barely survive

our children win or loose

The people control, vs it's big governments role

is it legal this debt

everyone grieves, vs don't elect thieves,

our history we forget

Corrupt leaders went too far, time for feathers & tar

send them home in shame

they'll no longer steal, America can heal

no taxation without representation proclaim

Cruel

Our leaders used to inspire trust

more likely now to simply lust

for power, riches, fame or sex

pretending brilliance, their jobs so complex

A handful of sociopaths running our lives

the tipping point soon arrives

one way or another the awakening is here

enormous debt is cause for fear

Precious liberty has done you in

leaders are simply delighted with sin

you keep electing charming fools

who impose unconstitutional rules

Freedom means the people choose

socialism can only abuse

do you really want politicians to rule

their hearts are uncaring & cruel

Overcome

Republicans freed the slave

they were determined, they were brave

Democrats preserve the status quo

something the black man doesn't seem to know

The press has been lying for years

social programs have caused many tears

self reliance is the goal

liberalism steals your soul

Prejudice is ugly but better that

than sitting on your ass getting fat

bigots are fools just walk away

pick a fight or choose to pray

Take care of yourself go to school

teach your children the golden rule

but why on earth vote away freedom

what ever happened to overcome

Sink

The problem is the national debt

spend all your money what do you get

sudden ruin is at your door

even the wealthy are overnight poor

Deliberately socialists destroy our land

their ideas, purely noble & grand

a one world government to oppress us all

naturally the elite will answer the call

Intellectuals know what's best for you

they decide what's right & true

run our lives from cradle to grave

the industrious man is simply a knave

The common man knows what's best

it's not big government that blessed

politicians have led us to the brink

pay off the debt or the ship will sink

Flood

*The Shining City on a hill is starting to slide
debt is the mud, stimulus, they lied
real stimulus they call greed
the desire to thrive & your family feed*

*Capitalism is the golden goose
socialism is a noose
it benefits the elite
pseudo intellectuals full of conceit*

*It takes millions of people to create
a complex society that is free & great
when power is placed in the hands of a few
progress is ended they create nothing new*

*It's individuals that make a society strong
white collar, blue collar, those with a song
politicians do nothing but sling mud
national debt is a flood*

*Clear
Lend an ear
truth is dear
has no peer
good men cheer
the evil leer
& besmear
they'll sneer
& jeer
ultimately tremble with fear
truth's always here
can bring a tear
expose a liars veneer
or tears of joy for the sincere
seems queer
but you needn't
volunteer
be a pioneer
or some kind of heroic musketeer
just don't be insincere
interfere
or domineer
there's nothing fancy to engineer
needn't create atmosphere
it's not a career
or how you appear
just revere
the truth & hold it near
then persevere
& always be clear*

Applaud

Liberals, progressives, steal your soul

their sole desire is for control

they destroy everything that makes you free

create misery deliberately

Crash the economy for political gain

their agenda is simply insane

do they really believe in the greater good

their intentions are misunderstood

Power is all they desire

it's a sickness, an all consuming fire

they don't give a damn about their fellow man

domination the only plan

Those who can't do teach

if politicians had faith they'd preach

but being godless they play god

seeking approval as the ignorant applaud

Parasite

Our forefathers had it right

individual freedom is shimmering bright

matters not - red, yellow, black or white

liberty is out of sight

it's the way to excel, to delight

not with the sword of political might

the creative man has power, with pen I write

it's the ability to choose that makes us forthright

man is basically good & soars to great height

constantly searching for the light

improving the world not causing blight

most men are not filled with spite

generous & caring usually polite

helping those in pain & filled with fright

it's politicians who are small & tight

they constantly incite

make problems creative men they slight

accusing, never contrite

themselves they should indite

creating nothing pure parasite

Improve

*A living document I've heard it before
words of wisdom the socialists ignore
damn right the Constitution's alive
it's why Americans thrive*

*What you desire is change
freedom's not good enough, strange
you seek oppression not a better life
all you offer is Old World strife*

*Your idea of change is the same old thing
desire nobility, think you're a King
excuse me master but I ain't your slave
give me freedom or give me the grave*

*I am endowed with inalienable rights
bow before God not parasites
think "America is downright mean," move
the Constitution's not something you can improve*

National Debt

*Don't understand the national debt
we pay our bills, seldom forget
government writes checks for our kids to pay
the people, your country, you betray*

*Is it constitutional, I want to know
fourteen trillion & continuing to grow
Communist China is the bank
their leaders laughing "we own you Yank"*

*Oh but our leaders are so wise
the mortgage payment comes due, surprise
sold America to the Communists
heck of an ironic twist*

*Washington is out of control
take back America that's the goal
or our children will suffer for the politician's sin
that & they'll have to learn Mandarin*

Need A Fix

*When Professional politicians need a fix, they tax
like a junkie getting his kicks, such tracks
an overdose the outcome it's true, oh my
isn't the addict turning blue, we die*

*The solution is simple get clean, right now
before it's too late get mean, know how
toss the bums out on their ear, today
the wimp, her majesty & the queer, so gay*

*Engineer a collapse, Fanny
& Freddy toss craps, uncanny
brought down the market ker-splat, tut tut
life savings gone just like that, so what*

*Ruin America for political gain, with glee
laughing as you cause such pain, you'll see
a junkie's reward awaits you some day, believe
in the overall scheme of things you'll pay, & grieve*

American Dream

*Individual freedom the theme
our children's eyes will shimmer & gleam
so proud they'll beam
We the People self esteem
liberals, are not what they seem
they daydream
about an extreme
regime
a socialist scheme
they blaspheme
scream
time to redeem
get on the team
get a head of steam
pass on the American dream
it's supreme*

Endowed

*In the doctors office we need privacy
there's simply much to much to see
it's none of your business how I'm endowed
stay out Uncle Sam you're not allowed*

*It's my business what I say to Doc
don't open that door don't even knock
stop regulating us to death
none of your business when I take my last breath*

*Go do your job the borders patrol
stop stealing our money you're out of control
all we expect of government is less
We the People, you the mess*

*We've put up with you fools for too long
the people are tired, but getting strong
it's not me or my doctor that's sick
it's you, your mental, total lunatic*

The Instructor

*Laura, it's not about the flora
& fauna
or time spent, Kent,
in the sauna
don't pout, shout, or doubt
it's about, liberty being free
that's Americana
Donna*

Poltroon

*The bloom
is off the rose, pure gloom
& doom
not freedom's sweet perfume
our most sacred valued heirloom
government wants to run your life from womb
to tomb
people fume
hard times loom
prices zoom
the wealth of our nation politicians consume
stand back make room
here comes the broom
sweep each poltroon*

Protect

Protect the border & fight the war

get out of our lives & pockets - hit the door

we don't need you to rule

we're free you fool

Stop pretending to be wise

stop telling your ugly lies

We the People have ideas & work

almost every politician is just a jerk

What do you actually create

nothing, you nauseate

protection is your only job

instead of doing it, my children you rob

Oaths evidently were meant to be broken

thru both sides of your mouth lies are spoken

promise everything but you've nothing to give

get out of our way Senator & let us live

Splatter

America a melting pot we're the batter

we're all getting fatter

been listening to the mad hatter

pure chatter

the pot is falling prepare for the clatter

better scatter

liberals ask does it matter

what if the pot does shatter

we're all a tatter

it's our forefathers we need to flatter

they warned us don't prater

in these days latter

be free or splatter

Nation

Appreciate your admiration

but it's mostly perspiration

some inspiration

& the fact that I love my nation

Measure Twice

Spending is out of control

you know your role

serve the people ignore the press

they helped cause this mess

Measure twice & cut once

be prepared as opposition confronts

look at the budget what must you spend

all other programs must end

Funding the arts is pure waste

break out your pen make haste

what's constitutional what's not

we've been sold representatives bought

Defend our nation, her peoples rights

be prepared for constant fights

do not compromise our freedom away

follow the money today

Chum

The odium

have become

troublesome

scum

feeding us hum drum

pablum

you fooled some

the rhetoric cumbersome

never kept to a minimum

hope we'll succumb

think we're dumb

no just numb

because of what you've become

power your opium

we will overcome

your delirium

chum

toss each & every bum

take government back to a minimum

called freedom

Equality

Equality's an ugly word

ends your freedom haven't you heard

we're only equal under the law

anything else, a mortal flaw

The American Dream - opportunity

only happens when you're free

free to choose your own path

without fear of government wrath

Americans have become afraid

breaks my heart we've been betrayed

our leaders lead us into debt

it's our money, our country, they forget

There is no excuse for your excess

the brink of ruin, what a mess

we are not equal we're much better than that

no matter what you think, progressive liberal democrat

We're Free

We're the best

because we quest

constantly scheme

to live our dream

Opportunity seize

always please

we have the key

we're free

Stay

You betray

causing decay

& dismay

with feet of clay

leading astray

you portray

our naivety

each day

it's ok

we'll have our way

hard work & pray

America's here to stay

Extreme

Tea Party people are not extreme

Constitutional the theme

*what's the foundation for legislative theft
representative - yes you there on the left*

*What provision is there for trillions in waste
it's our money that you've misplaced
end it now no more programs for the poor
or soon all are poor, our principles restore*

*Social programs cause massive grief
government itself becomes the thief
creating a class of dependent fools
denied their humanity, just political tools*

*Get off your ass, excel, find a job
why in the world be a lazy slob
politicians lied*

the American ideal is self reliance & pride

The Deal

*What's the American ideal
no Neil*

*not the automobile
it's the fact that you need not kneel
to some king & kiss his seal
it's the simple appeal*

*of the spiel
no matter what you feel
what's real
is the zeal*

*of the mercantile
don't squeal
I'm no heel*

*Lucile
be gentile
it's still a crime to steal
or even conceal
let me reveal*

*the fancy liberal wrapping peel
only freedom can heal
regulations repeal
simple barter is sublime, unreal
trust me it's all about the deal*

Fateful Hour

*History teaches us many things
there's no such thing as benevolent kings
excess government is evil my friend
forcing everyone's knees to bend*

*Individuals are wise
freedom is the ultimate prize
the only good accomplished on earth
is by each person given birth*

*Never consider the good of all
therein lies the ultimate fall
the common good is not a welfare state
individual freedom our mandate*

*The Constitution must be your guide
you swore to uphold her but you lied
all consuming your lust for power
America has reached a fateful hour*

Moralist

*Remember him well the Rugged Individualist
not much of a conversationalist
his horse he kissed
certainly no prohibitionist
smartest
artist
in his field, sort of a purist
did it right, darn perfectionist
a quiet idealist
smiling happy optimist
knew how to get things done, glad to assist
helped the ladies, he'd say mam I insist
wasn't no conformist
or pacifist
with a limp wrist
no he'd use his fist
if needed he'd enlist
proud of America a moralist
worked hard a regular capitalist
but generous, the golden rule, no atheist
finally regulated out of existence by some neo-marxist*

Excel

*The nature of man is to excel
making us equal is living hell
we're not equal we're diverse
forced equality is a curse*

Equal under the law

*anything else is a flaw
each person gets one vote quite true
other than that I'm nothing like you*

I've my own dreams to fulfill

*the bard spends his time with a quill
my ambition is mine alone
sometimes too busy to answer the phone*

When my mind begins to race

*words flowing at a frantic pace
the last thing I need is an even playing field
need freedom & you need to yield*

Old Glory

Proud of Old Glory

the fight for freedom to defy the Tory

& a long list of the predatory

Written in blood not metaphor, no allegory

liberty or death is mandatory

a call to action not just oratory

Hoary

pacifists call us inflammatory

are constantly derogatory

accuse us of being too monitory

tell us we need to take inventory

but freedom is transitory

to the conciliatory

This is the repository

of independence, it's obligatory

long as I'm ambulatory

I won't bow to exclamatory

fools putting us in some socio-ethnic category

turning us into an unconstitutional reformatory

a socialist laboratory

we're free Americans end of story

Craps

*How much debt can you create
surely you know you're tempting fate
from gambling debt you're not immune
what a goon*

*Socialist schemes twist greater good
freedom must be misunderstood
you're spending our money fool
uncool*

*You seem to think you have the right
to take what's mine you parasite
the hen house minded by the fox
ballot box*

*You're fired, you're just a thief
causing everyone bloody grief
our economy may collapse
you're shooting craps*

Rant

*Tired of hearing the sycophant
rant
say anything to enchant
kiss ass dilettante
nothing to offer no seed to plant
the hierophant
of we can't
master of the slur America chant
freedom, with fairness supplant
author of many a grant
surrounded by Czars with brains like an ant
with Castro & Chavez gallivant
needs a shoe implant*

Sage

*Sad age
government's building a cage
creating rage
enormous taxes on each wage
our debt an outrage
read the Constitution each page
we need another Sage*

What's Best

*Are you free to see the doctor
or lucky to see his nurse
will they send the counselor
who'll order up your hearse*

*Just go home and take a pill
it's time for you to die
when you're old your time has come
call your friends & loved ones, say goodbye*

*Politicians are compassionate
they really know what's best
your quality of life is nil
take the pill - rest*

*Medicaid at sixty five
pay for every drug
but don't you burden society
or they pull the plug*

Aid

*Liberals have been on a tireless crusade
our system of government they seek to upgrade
a cavalcade
of feel good ideas they parade
often the ignorant they persuade
with their masquerade
Patriotic Americans feel betrayed
many, the ultimate price have paid
to preserve our freedom from ideas that invade
warmongers is how they're portrayed
called baby killers, sadly repaid
Don't be dismayed
most of us are not swayed
by the socialist charade
& fools who degrade
Liberty will not fade
the flag may be frayed
but our Constitution makes the grade
the will of the people shall be obeyed
the ballot box is where real change is made*

The Fool

Violence the tool, of the fool

I use my pen, for all men

things are grave, yes the knave

can sink the boat, just vote

Don't cause decay, have your say

freedom for all, or we fall

yes the slow, has his role

he must be heard, each word

Not just the wise, know the prize

simple men see, being free

is the goal, they have soul

so please take care, be fair

Contribute much, with a touch

the garden grows, shoo the crows

but use your might, loose the fight

violence & greed, kills the seed

Debtor Nation

The greatest debtor nation of all time

it's a crime

the land of opportunity

are we free

Our national debt

the real threat

to our children & way of life

borrowed strife

Taxes are an attack

pay it back

end the welfare state

or tempt fate

Don't pretend you care

do not dare

you haven't got a heart

& aren't smart

Abort

Nothing liberal about a liberal brother

they want control worse than your mother

often use the carrot on a string

that & the oh so effective nose ring

They never give without reason

their excess borders on treason

generous with other peoples money

if it weren't so sad it would be funny

The have an image of being kind & wise

but in the end freedom they despise

the poor & minorities with their hand out

don't even notice the ring in their snout

Liberals create victims & smear the right

control freaks - in chains they delight

underprivileged they pretend to support

but it's mostly minority babies they help to abort

Borders

An open society requires a closed border

civility demands order

citizens must respect the law

revere their country with sacred awe

Our culture is complex but traditions few

no national dance or costumes it's true

what makes us American is robust

for all things good we lust

Achievement is what we desire most

accomplishment the dream of which we boast

each individual striving for success

by God, freedom itself will bless

Play by the rules but think outside the box

be original, unique, unorthodox

but be legit or pay the price

you don't sneak into paradise

Look Too Far

*An important part of freedom is law
limits we must clearly draw
everyone playing by the same rules
a level playing field but different tools*

*Each unique talent allowed to flourish
the soil is freedom God will nourish
inspiration ~ the sun that shines
law is each row ~ pure straight lines*

*So if you come to America under a fence
sneak cross the river, it's an offense
you trespass
you're already part of the criminal class*

*Immigrate, cross your T's dot your I's
have respect for the ultimate prize
or better yet fight corruption where you are
looking for freedom ~ perhaps you look too far*

Plan

*You'll either believe in man, or you won't
think he's basically good or you don't
I've seen people band together in tough times
seen the spirit of man & how it climbs*

*Even a thief will risk his life to save a child
why is the common man so reviled
politicians think we're evil
without their guidance face upheaval*

*Americans are the most generous people on earth
because we're free, by God, from birth
it's politicians who are full of greed
on our worst fears the feed*

*The biggest thieves are in Washington
providing health care & taking your gun
only time I doubt the the basic goodness of man
is when I see what politicians plan*

Propagandist

*Federal health care is unconstitutional senator
so is helping the poor
it's absolutely not your job
Robin Hood my butt, the poor you rob*

*We the People take care of the needy
you tax us to death because you're greedy
paybacks & deals you're sucking us dry
we've had enough senator don't cry*

*We're not telling lies or defaming your good name
for years you've been playing your lying game
time to get off our backs
enough of your libelous attacks*

*Your a big government socialist sir
another Marxist cur
speaking no truth
pure propaganda what falls from your lips is uncouth*

I Believe

*Yes his name is Abdullah
Buela
yes he's praying to Mecca
Rebecca*

*Yes I know he's in Arizona
Mona
yes it's called the religion of peace
Clarice*

*Yes I know - but that's what they call it
Kit
yes I agree but you'd have to ask them
Clem*

*No I'm afraid to ask too
Lou
no jihad is not love, God is, that's what I believe
Cleve*

Shan't Bother

*We believe in freedom of religion, not all religions do
if you think others are the infidel I'm talking about you
please don't come to America & look down your holy nose
with every lie you tell I see it grows*

*The Baptist & the Catholics don't always get along
still they love God, their fellow man, know right from wrong
you say you believe in peace then help finance jihad
are you sure you're worshiping, one true God*

*The Synagogue a sacred place, the Jew my brother
he doesn't worship Jesus, or Mary the Mother
but he fervently honors God & this gift of life
honest with his friends & loving to his wife*

*The bible, a collection of books by many inspired men
it didn't come down to us from a single pen
it isn't filled with hate for those who aren't the same
unlike another author whom I shan't bother to name*

Lout

*Most politicians think truth is irrelevant
the thing that matters is intent
we don't care what your intentions might be
you're interfering, you've forgotten we're free*

*Social programs are destructive & you regulate us to death
taxing us out of our liberty, tax us with each breath
but that's not enough, we're trillions in debt
you're destroying America, destroying without regret*

*You replace honor with socialist ideals
it's not about truth but how good it feels
so what if our children inherit your bill
for the sake of power you lie cheat & kill*

*Your time is up, enough is enough
no more big government, no bailouts, no guff
just go away & get out
enough of your lies you socialist lout*

Obfuscate

*Truth is a bitter pill
the politician would rather kill
than take his medicine which would heal
no he's much happier to simply steal*

*Put off till tomorrow the only cure
with your lies another day endure
but the truth is simple & sweet
for the common man it's meat*

*Liberals can not endure the truth
constantly smiling unclean uncouth
liberty is the answer you see
but they loose their power when you're free*

*So they lie & obfuscate
nothing do they create
but they know what's best for you
all the while ignoring what's good & true*

Her Soul

*If you need a lawyer to preserve your rights, it's too late
freedom now dependent on the magistrate
sovereignty belongs to the court, God be damned
out of your vote you're scammed*

*The Constitution made us free & proud
living document wearing a shroud
the law of the land replaced by the court
everything political now decided by tort*

*The people vote their true belief
the judge makes his ruling causing grief
marriage is not between a man & his wife
an unborn child butchered by knife*

*Upside down the nation spins into the mire
special interests lawyers funded by desire
the common man must take back control*

America through the court is loosing her soul

Do

Do something with your life create
don't accept failure & call it fate
you're responsible for tomorrow
you pass on joy or sorrow

Accomplish something & pass it on
do something today, soon time is gone
the next generation deserves your best
a better world for them the quest

They deserve just as much freedom & choice
as much opportunity a chance to rejoice
too much government, they don't deserve
liberty we must preserve

Shrink government down to size
a ten percent sales tax should be the prize
tax nothing, let business be king once more
or our children inherit the land of the poor

Recuse

The dictionary definition of marriage
is a man & woman, the courts miscarriage
can't these fools in black robes even read
it's their intention to plant evil seed

Destroy the family society at large
they have the same rights Mary & Marge
Steve & Larry can now take their vows
succumb to perversion the law now allows

Nobody condones prejudice but give me a break
marriage is sacred for heavens sake
cheerfully the courts pervert sanity
another nail for Christianity

Your vote means nothing before the court
California voters somehow came up short
the dictionary must be wrong
you're in the way of perversion now move along

With glee you slap the devout in the face
to hell with the people, the courts hear this case
so what if the judge is queer
recuse himself, fat chance my dear

Your Vote

*Ninety percent of government is waste
unconstitutional theft that can't be traced
graft & corruption run amok
steal that much money you need more than a truck*

*Payback & power without end
support my campaign, I'll be your friend
you'll get the contracts I guarantee
union bosses get the whole company*

*America the Beautiful is being remade
by your tax money all that we've paid
problem is that it ain't pretty
urban blight in every city*

*Politicians think you're a dope
only one hope
while we're afloat
use your brain, vote*

Experience

*Experience is overrated in politics
what do you need to know to put in the fix
you're either honest & listen to advice
or We the People pay the price*

*Don't want no politician I want an exec
someone of principal who'll stick out his neck
speak for America not apologize
who actually believes, freedom's the prize*

*Time for term limits they're a must
the honor of serving's a sacred trust
it should be shared by those qualified
by sycophant liars we've been mollified*

*Successful people should become involved
retired generals & businessmen, problem solved
the art of politics as we know it must end
just take a look at the way they spend*

They Rob

Barney, Maxine & Mr Dodd

yes they have, they've been playing god

they crashed the market with Fanny May

homeless Americans can only pray

Why aren't our leaders held responsible

they've made our lives unbearable

where are the charges that should have been brought

people saved their whole lives now what have they got

Our representatives get away with it

they think we're stupid & don't give a wit

it's not that they were bad at their job

they rob

They rob us of our inheritance

every law they pass defies good sense

it's expedient politically

devaluation is next wait & see

Socialist Rube

Never before have we been so betrayed

Roosevelt was bad, he stayed & stayed

elected for three long terms - a mistake

ratified the Constitution, freedom was at stake

Now we have one who's worse

thinks capitalism is evil, driving in reverse

wants to make us all equal - sound familiar

the teachings of Marx, an absolute killer

Obama hates everything we stand for

won't be happy until we're all poor

it's simply not fair America's had it too good

all nations, all people, are equal, understood

Don't want to be equal you ignorant boob

want to excel not be a socialist rube

excellence is the American dream

socialism, equality, an evil scheme

Self Esteem

Great evil is done in kindness's name

no surprise it's always the same

promise to take care of the poor & old

gain the wealth of nations, pure gold

But tell the ignorant to take care of themselves, hit the door

you're gone goodbye, you buy the votes of the poor

make promises you can not keep

tell them lies you won't lose any sleep

It's a part of your job description

promise to pay for that prescription

won't cost you a thing granny

we'll take care of you absolutely free

Never tell them to buck up & be strong

they'll just tell you to move along

independence & achievement is the American dream

progressive types have no self esteem

The Problem

Government is not the solution it's the problem

Dem

conservatives are not the problem but the solution

son

Less is better in politics & debt

fret

we have way too much of both

growth

When you're obese you diet

quit

or soon you can't walk

shock

Fat cat politicians it's time to lose weight

great

if you don't bother to get slim & trim

grim

Symbolic

Symbols are symbolic

like booze for the alcoholic

what matters is what you do

not all the "fru fru"

All the ribbons & slogans - vain

more than annoying - insane

you've done your part with a bumper sticker

why dirty your hands, it's so much quicker

What's really needed is your time

a neighborhood watch to fight crime

or volunteer for your candidate

don't accept defeat & call it fate

Actions make the world a better place

make a statement with your hands & smiling face

but it's really stupid to wear a ribbon on your lapel

as America goes to hell

Only Rhymes

Integrity, only rhymes with committee

it's something you do on your own

fidelity, a necessity

it's the cornerstone

It's a pity, bankrupt each city

once so proud

dignity replaced with depravity

sloth encouraged, not just allowed

The university teaches uniformity

we must be compassionate & care

give me opportunity, spontaneity

work hard & be fair

Only

The way to govern finely

is to govern benignly

divinely

not supinely

Incompatible

Socialism is incompatible with the Constitution

it's perversion, ideological pollution

*I know how much liberal types, pretend to care
misusing that clause - about general welfare*

*It doesn't give you the right to tax us at fifty percent
or steal from our kids without consent*

*for power you destroy the American way
the people are waking up, now it's time to pay*

*You're being voted out of office - know why
we're absolutely exhausted of the same old lie
professional politicians only care about power
each & every one of you - hit the shower*

*We're free you socialist morons, did you forget
this is our country we will not idly sit
all your programs are for the lazy & uncouth
what liberals need fear is the voting booth*

Autocrat

Liberal politicians are socialist scum

they don't want you to overcome

*freedom's their greatest fear, they want control
not liberation but power the goal*

*Liberal means you live & let live, it's about choice
when government's in control, will you rejoice
or will you long for the good old days when you were free
you voted for em, kiss the ring, bend a knee*

*It's not governments job to be your friend
feed & clothe you, listen closely attend
it's not their job to medicate or give you a house
time for you to decide are you a man or a mouse*

*Take care of yourself, help others if you desire
government has no right your generosity to require
that isn't liberal, it's the act of an autocrat
true liberals are thin, government's getting fat*

Pursue

*It's a choice to be unwise
to delight in wicked lies
easy to listen to the uncouth
seems hard to hold to the truth*

*Difficult this honesty
the one thing that set's you free
is your right, choice
& the freedom to use your voice*

*So stand up tall & be proud
be a man speak out loud
independence, your birthright
opportunity is delight*

*Many choose the easy path
that suddenly turns to chains & wrath
for when choices are made for you
you're not free dreams to pursue*

Brother's Keeper

*I'm my brothers keeper, not Uncle Sam
socialist programs are an ugly scam
charity is found in the hearts of men
government charity, is a sin*

*Giving & receiving, a blessing not a curse
better to give I remember the verse
government's taken that blessing away
in school they even forbid us to pray*

*They take your money & give to another
that's not charity that's big brother
you need to decide where the money goes
politicians may use it to bribe, who knows*

*Social programs are contrary to our highest laws
our forefathers clearly saw the potential flaws
so they enumerated the duty of the representative
says nothing about take from one, to another give*

Works Fine

*Socialism is contrary to the nature of man
perhaps in heaven it's the plan
but here on earth what's mine is mine
works fine*

*Freedom or slavery is the choice
work for yourself, you rejoice
work for the common good
doubt that you would*

*What's your incentive
almost no reason to live
without a goal you accomplish not
work for the common good what have you got*

*But when you work for you
each opportunity you pursue
you take pride your spirits soar
socialism makes everyone poor*

Less Is More

*When it comes to government less is more
when politicians get wealthy the people get poor
government must guarantee sovereignty
make each individual equal & free*

*In a nation where all men have choice
each man & woman has a voice
that's the American way
each man choosing his work & his pay*

*No guarantee or equal outcome
opportunity for all not some
when government makes the rules
it takes away the tools*

*What makes us great is freedom not power
we need change, this is the hour
the change we need is a return to small
time to re-overhaul*

Simple Man

*The simple man knows what to do
take care of family & live, why don't you
you're way too busy trying to lead
ego & power - pure greed*

*The simple man knows what is best
by everyday things he is blessed
yet you presume to know the way
for your arrogance all men pay*

*The simple man knows you pass it on
to the next generation for soon we are gone
he doesn't pretend to be brilliant & clever
knows he won't live forever*

*The simple man knows the value of labor
raising your children helping a neighbor
to honor & love your wife
the simple man knows about life*

Victory

*There is no need for leaders to rule
freedom is the priceless jewel
the people need you to keep out of the way
it's black & white your world is gray*

*Believe it or not there is right & wrong
you without principles, just move along
it's wrong to pile up debt
men without values have no regret*

*So don't pretend to lead
you've already shown, you're sick with greed
now we have to clean up the mess
the next generation we will bless*

*Children will thank us for taking back control
government of the people was always the goal
there will be songs of victory
thank God we're free*

A Seat

*When government feeds some of us it prepares all to be slaves
politicians are professional con men & knaves
before long we'll be standing in line for bread
without pride, unable to hold up our head*

*If we're the shining example of democracy
replace welfare with responsibility
make em stand on their own two feet
politicians & bureaucrats, shut up, take a seat*

*Excuse me but no one is entitled, not to my check
so called leaders, chained us, by the neck
taking half of what we make
then steal from our children for heaven's sake*

*So if you're collecting a welfare check
& didn't recently break your neck
perhaps it's time to go get a job
government's turned you into a lazy slob*

Thirty

*Thirty tyrants are thirty times worse than one
in Washington we have over five hundred
every day in every way free people, under the thumb
heck, at night I check under my bed*

*Still my nightmares do not diminish
the will of the people, abused
you'll be happy once we finish
feeling frightened & used*

*Don't want security
I want a job
opportunity
it's ambition you rob*

*We the People are in charge
we've become aware
day by day, year by year - government you enlarge
did you think we wouldn't care*

Jobless Recovery

A jobless recovery, cynical fool

*recovery my behind, did you make that rule
it ain't no recovery if a man can't find work
ask the unemployed mechanic or clerk*

That man used to own his own place

*he lost his home, everything, pure disgrace
a well spoken professional neat & clean
looking for work, toughest times he's seen*

His address, the homeless shelter

*lives under the bridge, in the day you swelter
cool at night Vegas weather
those looking for work hang out together*

If you can't find employment there is no recovery

*people waiting in lines is what I see
the economy must recover for all, you cynical slob
there is no recovery without a job*

Ate

You hesitate

deliberate

equivocate

debate

meditate

then gravitate

& cultivate

that which will suffocate

& our way of life liquidate

socialist ideas intoxicate

time to rehabilitate

perhaps medicate

stupidity eradicate

don't regulate

innovate

or allocate

you complicate

just reflect on what made America great

it's called freedom, participate

Renewal

Enough talk

walk the walk

you forgot

we're either free or we're not

Many a thief

causing grief

for power

wake up America this is the hour

Take little

don't belittle

you've tempted fate

we make America great

It isn't you

the powerful few

who rule

we do & we demand renewal

The Bill

Roll it back

put America in the black

without regret

end the debt

Don't fund the arts

break hearts

foreign aid

need not be paid

Social Security no more

except for the poor

truly care

end welfare

More revenue, cut taxes in half

congress fire your staff

fourteen trillion is overkill

pay the bill

Fools

Need revenue

try something new

break out the axes

cut taxes

Chop em down to size

freedom is the prize

abundance once more

taxation makes us poor

It also makes us slaves

tax the knaves

the sheriff has taken my sow, my cow

where's Robin Hood now

End the debt cut taxes in half

liberals smile & laugh

we're not fools anymore

you're deliberately making America poor

Gone

I'll tell you what doesn't work Mr Politician - you

you've never held a real job, it's true

capitalism works, get out of the way

we do our job & receive pay

Do you really believe you can improve the system

you're a virgin, "work" you haven't kissed em

don't know production can't balance a book

only thing you're good at is being a crook

Get some experience, you're nobody's boss

when it comes to management you're at a loss

you have diplomas but what do they mean

the real world you've never seen

It's about your hands, not just your mind

being useful, though your speech is refined

all talk & no work, an educated con

your time has come & gone

Slob

*Is there anything you don't manipulate
politicians are tempting fate
you'd tell God how to do his job
you slob*

*You know nothing about the world of men
commerce, industry - regulate with a pen
back room promises, you interfere
make a fool of yourself & have a beer*

*You love the cheering crowd
by your magnificence they are cowed
but in your heart you have contempt
we follow the rules, your friends are exempt*

*You lust for control I don't know why
from the moment we're born to the day we die
there you are telling us how to live
when you don't know how & have nothing to give*

Disease

*Professional politician - it's a disease
become a lawyer, get lot's of degrees
from simple honesty become exempt
for the common man develop contempt*

*It's not about substance but style
no matter what, act concerned & smile
tell everyone what they want to hear
the little old ladies will think you're a dear*

*Your disorder is simple my friend
self inflicted but you're on the mend
We the People have the antidote
we're going to cure you with the vote*

*You won't even have to resign
once out of office you'll be fine
it's a mental disorder not to worry
we'll get you fixed up in a hurry*

Natural State

*Freedom is the natural state of man
from the beginning that was the plan
God himself gave us freewill
all our hopes & desires, we fulfill*

*Men try to take that away
call it government, then make you pay
they call that taxes, but please attend
those in authority are not your friend*

*Once they taste power look out
they'll run your life do not doubt
from cradle to grave
you're their knave*

*Tell you when to sleep, to rise
on you always are their eyes
regulate, mandate, tell you when to die
take a look at Obama care - I do not lie*

Headed South

*Those who seek power must be denied
they are no servant, they are no guide
those who step up, because there is need
will serve us well, will plant a seed*

*If politics is what you do - go away
you do nothing useful, you lead men astray
if you've created jobs before
you probably know how to help the poor*

*If you've served with honor you may be right
to lead our nation if we need to fight
but if your thing is "politics"
another con man, fancy tricks*

*We need real men & women to answer the call
not empty shells, people who stand tall
politicians, fools who only work their mouth
we need honest folk, or we're headed south*

Tank

Our economy's in the tank

wonder who we should thank

no not business, politicians are to blame

they're the ones playing a game

We have the answers, your problems we'll fix

just more fancy tricks

no bail out - but out

that's what America's all about

Politics - pure show

steal what you can before you go

leave destruction in your wake

you've gone way too far - freedoms at stake

Preach independence & liberty then tax em to death

tax everything, tax every breath

they won't even know they're slaves

tax em right into their graves

Then tax their children create debt

steal every dime make em sweat

they'll turn to you for the solution

blame it on business & pollution

You have the carrot they're no longer free

totally dependent on you & me

you'll get their vote you write the check

get em by the wallet, by the neck

Just in time I suspect

your insanity we will correct

we don't need you anymore

all you've done is make us poor

Do your job, don't do ours

observe your enumerated powers

kindly seal our borders & get out of the way

shrink government, lower taxes, balance the budget today

Underclass

*The first entitlement to go is welfare
show the poor you really care
it's called tough love
forget the kid glove*

*You're keeping the poor, poor
why on earth should they want more
talking on a cell phone in their Caddy
more time for drugs big daddy*

*Education is for the man
play B ball & rap that's the plan
why in the world go to school
that's for losers, the uncool*

*When you steal a mans pride you're worse than a thief
destroy the family, permanent grief
the best thing you can do for the underclass
tell em to get a job & get off their ass*

Social Security

*Social security a really bad joke
what a surprise it's going broke
open your eyes
time to privatize*

*Trust me it's not part of the plan
security - Uncle Sam
the very idea's insane
our retirement, government's domain*

*Politicians love to intrude
gives them power you're subdued
don't be stunned
politicians own you & your retirement fund*

*Never given an option just pay
be good or they take it away
at least at work you can opt out
freedom that's what it's about*

The Blues

*Hard times bring people close
don't do no good being morose
overcoming, they share & care
grow & get stronger, screw welfare*

*Hard times inspire success
as you strive you learn to bless
building character & sweet memory
don't get anything good for free*

*Hard times make you strong
make you appreciate a good song
simple things delight & amuse
where do you think we got the blues*

*Hard times can be the best of times
wrote some of my very best rhymes
I look back & laugh
at the trials in my behalf*

*Learning
Discerning
a yearning
concerning
returning
as a kid, school spurning
liked earning
but thoughts are turning
to a burning
desire
for learning*

Eeeee

*Excuse me I'm free
keep your beady, greedy, seedy eyes off me
& your flaky, shaky, snaky, fingers - see
your huffy, puffy & stuffy, let me be*

*Your ungodly, shoddy, cloddy, plans are debris
ain't no Yankee, you make me cranky, pure hanky panky
just speechy, preachy, screechy, baloney
from a smurky, murky, quirky, turkey
ain't no dummy Senator, don't get chummy*

Strength

*In a world full of unrest
independence should be the quest
power, food, manufacturing
America used to be king*

*Now we import what we need
we haven't planted one seed
to secure our future or our strength
our opposition has gone to great length*

*Anti everything has broken our back
nuclear energy, oil & coal you attack
regulate drilling, refining, you fools
Arabs & Chinese will be making the rules*

*One world government is a sham
international cooperation murdered Uncle Sam
our only hope's to be independent & strong
stop pretending we can all get along*

Russian

*People around the world want to immigrate
but politicians don't think we're so great
other nations envy us because we're so strong
better stay in the lead where we belong*

*We're the good guys stop & reflect
only Germans speak German in Europe I suspect
they speak Tagalog not Japanese in the Philippines
& England still has her Queen*

*We didn't take over the world when we had our chance
we're not imperialist conquerors, as they claim in France
we fought for freedom for us & our friends
were we successful, that depends*

*Many around the world think we're fools
interfering & blind, we don't follow the rules
if the Soviets had possessed our kind of power
we'd all speak Russian this very hour*

Never Again

*We' letting anyone get the bomb now days
the middle east, everyone prays
praying isn't going to help a lot
Iran has the bomb, never again wasn't taught*

*Armageddon, is what they want
fulfill prophecy, religion flaunt
dead Jews is their goal
extremist Muslims have no soul*

*They literally want to play God
death to Christians the road they trod
no one told them, God is love
on their prayer rugs they don't look above*

*They look into the pits of hell
that's where their evil hearts dwell
Armageddon is at the door
never again, once more*

White Cane

*Doctors are taught to do no harm
politicians are causing alarm
they meddle where they have no right
fighting the wrong fight*

*They don't pursue freedom they enslave
their point of view is often grave
pretending to care for & help the poor
from everyone take more & more*

*What they do is to slowly enslave
run our lives from cradle to grave
arrogance & power, a deadly mix
destroying the democracy they pretend to fix*

*We don't need a fix we need free
when the blind lead the blind no one can see
politicians should be issued a white cane
worse than blind, insane*

Sheer Size

*Limited government is our right
oppression & debt we now fight
our Constitution does not allow
our supposed leaders, to make us bow*

*It's our duty to pass freedom along
make the next generation just as strong
you now own our money & tax us to death
destroy America without regret*

*Leaders, sorry I think not
constantly abuse the power you've got
you're sworn to uphold the law of our land
social programs are all you've planned*

*Social programs are not legal or right
such generosity causes blight
you kill our spirit with your big plans
it's big government our Constitution bans*

Grog

*Tired of the demagogue
monologue
free men you flog
our economy you clog
put sand in each cog
kick us like a dog
my mind's in a fog
only hope is in church & the synagogue
hell with people but protect a frog
& his bog
our government's a bloated hog
need to jog
in a digital world you're analogue
time to unclog
need work, get dialog
a socialist catalog
from a pedagogue
I need some eggnog
no some grog*

Regulate

*Where in the Constitution does it say regulate
interstate commerce, that's about it, great
how can Washington tell the states what to do
regulate drilling, refineries, regulate you*

*It's not the job of Washington to run our lives
control industry, or what someone drives
they shouldn't be funding the arts
they shouldn't even be running the parks*

*It annoys me to death to pay a fee
to see the grand canyon, thought I was free
everywhere you look government workers on the dole
sorry but that just isn't government's role*

*No wonder we're trillions in debt
over our children's future the intelligent fret
time for us to return to reality
mandates, regulations & federal workers is all I see*

Parole

*Can't drill a hole
or dig for coal
without rigmarole
big brother's in control
green scene the goal
droll*

*not one opinion should you extol
don't tell me what kind of cereal to put in my bowl
or the best ingredients for my casserole
your sole
role*

*borders patrol
fight wars, keep us whole
not take a poll
cajole
or pretend to have soul
at parks & freeways charge no toll*

*protect no foal
fish, frog or mole
balance the budget, a flat tax no loophole
you're all guilty, on parole
freedom you stole*

It's About You

*You have to be a moron to think socialism has anything to offer
that's all intellectuals seem to proffer
just goes to prove what most of us know
over educated fools are really slow*

*Book learning's just that
in the real world you roll up your sleeves don a hard hat
if you want to accomplish anything smart
work hard, be proud, have heart*

*But if you intellectualize
you're an idiot & missed the prize
waste of time to dream of a better world my long haired friend
won't happen no matter how much of our money you spend*

*What makes the world a better place
is the smile upon your face
as you work to improve your own life
it's about you, your faith, your family, your wife*

Late

*Pleas don't allocate
abdicate
before we suffocate
don't communicate
equivocate
& for God sake don't proliferate
time to illuminate
locate
isolate
& eradicate
the fools that regulate
time to renovate
extricate
those who manipulate
stipulate
& dedicate
themselves to taxing you prostrate
making you irate
don't procrastinate
do it now before it's too late*

Infidel

*If you think others are the infidel, go home
Abraham's the father of the Jews & those who roam
the father of the Christians the family of man
you're deluded, ignorant of the plan*

*I have no problem with anyone's belief
but your people are killing & causing grief
so leave behind your sharia law
trust me, prejudice is a flaw*

*There is only one true God he is love
there is no place for hate below or above
Mr Obama is totally wrong
we're a Christian nation if that's a problem move along*

*We don't mind you practicing your faith in God
if you're sincere in your love we applaud
but if you think Jews & Christians are the infidel
you're on the side of those who kill*

Drill Baby Drill

*National security means we produce our own oil
eventually that mess in the Mid East is going to boil
what ever happened to drill baby drill
hear Arab extremists scream kill baby kill*

*You can't depend on the Middle East
energy independence or soon we'll get fleeced
we have coal & natural gas
politicians regulate & harass*

*Do nothing cross your fingers & wait
leave our children's future entirely to fate
is that really the American way
to sit on our hands & pray*

*God helps those who help themselves I'm told
elect those who'll deregulate & be bold
energy independence will make us secure
drill baby drill will ensure we endure*

Upside Down

*It's an upside down world indeed
politicians are consumed with greed
it's the businessman who has heart
Ivy League graduates - not so smart*

*Representatives don't represent
passing laws without consent
many in submission to the few
don't give a damn about me & you*

*Dreams & ideals they applaud
progressive, superior, scoffing at God
think they're better than the common man
trashing our Constitution for a better plan*

*That plan has failed again & again
it's freedom that burns in the hearts of men
pseudo intellectuals need to go find a real job
socialist thieves in daylight & the dark they rob*

Not Alike

*Tea Party people are not alike
Doctors, lawyers guys on a bike
long hair & tattoos to professional guys
black, white, gay & straight - socialize*

*The thing they have in common is this
they love their country, freedom is bliss
they loathe the debt being piled on our kids
believe it's something the Constitution forbids*

*It's not a collection of rich white men
some are Democrats, liberal as sin
they believe Washington's out of control
to reign in the government is the goal*

*Uncle Sam is becoming Big Brother
with propaganda, truth they smother
the Tea Party is not what you see on T V
American patriots, you & me*

MLK

Martin Luther King was Republican - it's true

*Democrats are the party of slavery, nothing new
they love shackles & chains
use your brains*

George Wallace refused to integrate

*people had to demonstrate
the federal government finally stepped in
progress, fairness would ultimately win*

Ol' George & his ilk are Democrats yesterday & today

*no integrating the schools down Alabama way
it's gotten worse now it's dependency
abortion, crime, drugs, ah yes free*

He's your friend that liberal Democrat

*he laughing & getting fat
the chains are still round your neck
you've traded your freedom for a welfare check*

To Conserve

If you're not living the American dream

*have no plans, not scheming a scheme
coaching little league, going to church
or a soccer mom - time to search*

You may have time to write a book

*get off the couch take a look
find something exciting that you can be
few people in this world are so free*

Abundance unique, freedom its source

*the individual is a force
with power to create
each person can be great*

It's not the greater good we serve

*or the environment we need to conserve
preserve opportunity freedom the goal
it's politicians & judges we must control*

Green But Red

*Environmental movement, the home of displaced Marxists
the wall came down & you moved, you've been missed
like a bunion or bad case of gout
no doubt*

*Capitalist hating losers on the move have gone green
trust me it's not about the earth being clean
it's about taxing the rich out of existence
shouting down any resistance*

*It's not about preserving the animals the air
you don't care
the truth
it's not farmers & hunters that are uncouth*

*They care for the environment
you don't, you care for taxes & big government
bunch of lying chameleons you're not green but red
really didn't think big brother was dead*

Only Hate

*What's left, everything that isn't right
conservatism is delight
entrepreneurs make the world a better place
right out front running the race*

*Creative people provide jobs
get out of their way socialist slobs
they make the world go round
doing good work that's where their found*

*The left can only destroy
leave the world void of joy
want to make us equal I suppose
offer up offal pretend it's a rose*

*Capitalism works
liberals are absolute jerks
all they do is regulate
they have no integrity only hate*

Libbers

Get a real kick out the libbers

woman rights, bunch of fibbers

neo-marxist trouble makers

woman's rights my behind, you're fakers

You defend liberal woman all right

defame a conservative, you delight

it's clear what you are

bizarre

What bothers me is the lie

can't help but wonder why

what are you trying to conceal

is it our freedom you try to steal

You don't give a damn about women

with socialist ideas your mind is swimmin

why not be honest have have integrity

the thing you hate most is that we're free

Touch

There's good & bad everywhere

but look out for fools who pretend to care

they have sinister things on the agenda

tax you right out of your hacienda

Its always been like that

liars who claim business is getting fat

by keeping the little guy down

words of a clown

Say whatever you think will please

as opportunity you freeze

are you fighting the good fight

or is it the conservative on the right

No nation in history has lifted man

like America that's freedom's plan

you interfere too much

destroy everything you touch

Plan

Have no problem with the greedy

I have problems with the seedy

greedy men move things along

they're motivated, strong

Beware the politician who has compassion

great smile, nice hair impeccable fashion

what he lusts for is power

longs for the ivory tower

America has no room for kings

we have better things

like opportunity

& the fact that we're free

Then government gets involved

equality, common good, problem solved

so who's really the greedy man

employers or politicians with a plan

Your Role

When America is threatened the people rise up

when the people are hungry we pass the cup

don't need government to help us out

we do just fine, were brave & caring, no doubt

Pass laws for compassion's sake

everyone's aware you're on the take

take your restrictions & go away

when times get tough we have faith, we pray

The answers aren't found in Washington

needn't control speech or take our gun

you need to leave us alone

if we need you, we'll phone

Becoming clear you do nothing right

thus far the people have been polite

but your debt & taxes are out of control

you don't know your role

Full Of Joy

I'll admit it I have hope

it won't be easy I'm no dope

but the American spirit is to succeed

it's not about greed

We love to get ahead

won't stand in line for a crust of bread

we've just about had enough

of your socialist stuff

Socialism & freedom do not mix

Marx is for lunatics

no sane man works for the common good

compassion is misunderstood

You say compassion but mean control

domination is your goal

it's not in our nature to control & destroy

you're being rejected, I'm optimistic "oh boy"

Rights

Rights are important but few

a simple idea hardly new

rights are from God not man

freedom was the plan

You have the right to religion & speech

you can even go out & preach

life liberty, the pursuit of happiness

simple things that greatly bless

Rights are not given by men

but can be denied with the stroke of a pen

guns are bad you don't need to bear arms

free speech controlled, sound the alarm

You have no right to health care, house or car

government has gone way too far

rights come from heaven above

just like love

Violating

*Government is violating your rights
just by growing to great heights
& interfering in everything
like a king*

*Health care is not government's job
help to the poor as the rich they rob
regulating everything with the commerce clause
all the while breaking fundamental laws*

*They have no right to tell you how to live
they have no right to demand you give
defense is about all they're allowed to do
their responsibilities are specific & few*

*Big brother is drawing near
government not invasion what I fear
can't pursue happiness while under the thumb
our rights depend on freedom*

Just Ate

*Government feels no love or hate
as they confiscate
your estate
relocate
big brother won't tolerate
debate
won't mediate
they just accumulate
if you have ten they take eight
you elected the candidate
so he has the right to liquidate
he will stipulate
not postulate
then regulate
desegregate
he can allocate
or dedicate
even medicate
hay you belong to the state
ain't it great*

Loose Weight

*What on earth is Government doing with trillions
didn't like it when they were stealing billions
half of the harvest half of the bounty
federal, state, city & county*

*Our children's prosperity gone
the rule of law treaded upon
representative government run amok
have the nerve to call it democracy, I'm awestruck*

*It's not democracy, that which you swore to uphold
is being destroyed, the people controlled
limited government is our birthright
you betray your country, you're a parasite*

*Such overindulgence is clearly disease
time for a diet if you please
pleased or not too bad
you're going to loose weight comrade*

Blizzards

*Breaking records blizzards are storming
coldest winter on record, it's global warming
cancel the Super Bowl it's too cold
it's freezing in Dallas put the game on hold*

*How cold can Dallas be I'm confused
Mr Gore is so wise so enthused
about the coming global burn
wonder how much money he's gonna earn*

*Maybe just maybe, God has a plan
warm & cold don't depend on man
perhaps he has some grand design
perhaps weather is actually divine*

*How can that be man is to blame
common sense be damned, you must be insane
global warming is a grand joke
except for the fact that we're broke*

Common Good

*Get a grip America before it's too late
it wasn't fate or luck that made you great
it was freedom & individual rights
opportunity delights*

*Our leaders are wringing freedoms neck
the city on a hill becoming a wreck
the Constitution they swore to uphold
shredded daily more freedom withhold*

*They think the Constitution is a joke
a living document that they choke
they plan on killing her with the court
America destroyed by tort*

*Guess who interprets the Constitution
executioners in black robes have the solution
general welfare is now the common good
they don't look at freedom as they should*

Good For All

*What's good for most, is not good for all
all rights need preserved or surely we fall
we have the right to our wage every penny
government has no right to it, not any*

*Tax us if we go to war
at the cash register, the rich & the poor
but you have no right to steal my dream
give it away, sick socialist scheme*

*General welfare means freedom not theft
when you interfere nothings left
no pride no wealth no independence
between rich & poor you build a fence*

*I'm exhausted with liberal lies
Democrats rejoice as freedom dies
Republicans freed the slave
free us from debt, the situation's grave*

Legacy

*We remember your legacy senator Bird
so much malice heard
pretending to be wise such verbal skill
Democrats harboring the great grand kleagle*

*Enslaving forever the hearts of men
power over the ignorant, with the stroke of a pen
you stole their hopes & dreams
with socialist schemes*

*You don't need chains to enslave
put em on welfare from cradle to grave
kill the family replace it with state
teach em to hate*

*Remove incentive, let them resent
never let em know what you represent
they'll forget all about Bird & Wallace
as they elect you right back into office*

Ant

*Never become complacent
or knees will be bent
patriots labeled malcontent
when free men are dormant
they soon deal with torment
at the hands of the ever resurgent
insurgent
& his repugnant
informant
no trial no warrant
abhorrent
evil 's incessant
most unpleasant
if you don't want to be made a peasant
it's urgent
expose every socialist tyrant
evil ideas, do not be tolerant
big brother is an arrant
parent
King, Czar or President*

A Freeze

*Democracy has no room for socialist ideal
you can't vote in whatever you feel
democracy is rule of law
the Constitution - see the flaw*

*The masses can not vote away the freedom of a few
that's something entirely new
can't tell people what to eat or don't smoke outside
these are acts of arrogant pride*

*Free will is a sacred trust
opportunity is a must
regulation's not government's job
are we ruled by the mob*

*Sadly the mob lives in Washington
they cater to unions & take away your gun
civil rights are only for minorities
on freedom they've put a freeze*

Control

*Who gave government the right to regulate air
for the life of me, can't believe they care
how can they limit CO₂
it's a scheme, another huge tax on you know who*

*Washington now taxes everything
that's why we rebelled from the King
how dare you tax our tea
King George is laughing at you & me*

*Tax the air, your hair, your wage, each page,
your breath, your death, your life, your wife
each child, is filed, numbered, encumbered
yes ol George is laughing at what's occurred*

*In his grave
laughing at the land of the free home of the brave
so you thought I was bad
bend over you've been had*

*England wasn't in your bed
taxing the dead
& the air you breathe
this is not what our founding fathers bequeath*

Catholic

*You can't be Catholic & be pro choice Mr senator
woman's rights & helping the poor
a Christian has no innocent blood on his hand
he takes a stand*

*Our rights come from God above
charity our birthright we act in love
a million deaths each year is abomination
bringing God's wrath down upon our nation*

*More souls today die at the butchers hand
than in all other ways combined in this land
dead the right to life liberty & pursuit of happiness
God forgive us what a mess*

*Into the court where it did not belong
flows the blood of innocents, not the brave & strong
condemning America to answer in full
to my children ~ were you merciful*

Desperate

*Abortion - a heinous crime
you murder an innocent, every time
a woman can do with her body as she wills
but that doesn't cover the child she kills*

*That child is a person with a soul
his name entered in God's heavenly scroll
you have no right to end that life
because you not someone's wife*

*When you said yes, you made your choice
pregnant, you should rejoice
don't sleep around if you don't want a child
then commit murder, you are defiled*

*Today it doesn't matter, prejudice we've mastered
there is no stigma, no one thinks bastard
those days are gone you don't need to hide
no need to become an unwilling bride*

*Not in a position to be a mother
no problem give your child to another
he's precious - abortion must be stopped
there is no excuse, people want to adopt*

Another

*I've never known a woman to abort a fetus & not grieve
remorse & fear damage the soul especially for those who believe
even those who have no faith feel the loss inside
taking the life of your own child is worse than homicide*

*A part of yourself is suddenly dead
there's emptiness a feeling of dread
thoughts keep returning to what might have been
suddenly acquainted with mortal sin*

*Nothing is so precious as an innocent child
how on God's green earth can he be reviled
did you really want him dead
did he suffer as he bled*

*Will he cry at Heavens gate
Lord why was this my fate
I deserved a loving mother
couldn't you have given me to another*

Being Alive

*Been playing around - may be
for God's sake don't kill your baby
it's called adoption - don't be sad
your child is a blessing - be glad*

*You're not ready for a child - fine
he's still here by design
heaven above has prepared him a place
a loving family that will embrace*

*Your child is alive a person a man
he's a vital part of God's plan
he wouldn't be here if not for you
it's very important what you do*

*You may be sad when you give him away
you won't watch him grow or see him play
but because of your choice he will survive
what's more important as being alive*

Unborn

I'm tired of the nags

lovers of death, a bunch of hags

nasty old bats burning their bra

everything you stand for sticks in my craw

I don't like the way you shove your sex in my face

my mother God bless her considered you a disgrace

there's nothing about you that's nurturing, feminine

bunch of sickos who hate real men

You're more comfortable with a guy in a dress

socialism is all you bless

it's clear what you desire

Sara Palin, a stake, a fire

You pretend to represent women everywhere

when conservatives are attacked you don't care

what's really sick isn't your scorn

but your war on the unborn

Killing America

Abortion is killing America this I believe

for this great land under God I grieve

innocent children butchered en mass

worse than Germany, the Jews, the gas

A million each year not just depressing

God must surely withhold his blessing

everything that made us great & good

has decayed, is misunderstood

We used to champion the little guy

now we abort him, wonder why

why is death winning over life

how can a man marry without a wife

We have become a land without God

it's a perilous road we now trod

pray we open our eyes before it's too late

& return to the principles that made us great

His Seat

Our problem isn't debt or jobs

our representatives are greedy slobs

who don't know their place

what they've done to America is a disgrace

We can clean up the mess, it's up to us

professional politicians must go, don't fuss

when an employee can't do the job - pink slip

this is no dictatorship

We need good simple people who'll just say no

no taxes, no spending, debt & regulations must go

the private sector will suddenly thrive

drastically shrink Washington to survive

They have no right to control

vote them all out of office that's our first goal

take back America from the liberal elite

if you're tired of your congressman, run for his seat

Work

A feel good state of mind

all pretend you will find

how can you feel good giving my money away

don't believe in God but you need to pray

You destroy with good intentions

logic be damned as well as conventions

what's yours is mine & mine is yours

you rely on sick evil liars for cures

Excuse me but utopia does not exist

by the king of all liars you've been kissed

you put your faith in the liberal elite

get off your ass stand on your feet

Want to make the world a better place

roll up your sleeves put a smile on your face

to really help others requires work

stop listening to that socialist jerk

Enumerate

Examine each word, what does it mean

when they say progressive, is it a scheme

just the word liberal makes me confused

take a close look at how words are used

The word liberal comes from liberty

but liberals regulate till we're not free

control our life & death with Obamacare

the word liberal abused it ain't fair

When you take an oath before God & man

but in your heart have another plan

bold faced lies, back room deals

just words, screw sacred ideals

The Constitution you swore to uphold

is limited government, you are bold

or don't you understand the word enumerate

look it up, refers to a list, it does not mean inflate

Defined

Politicians are totally out of control

limited government no longer the goal

stay out of our pocket filthy slime

you violate the Constitution, it's a crime

You have no right to tax us to death

regulate our every breath

protect the borders & leave us alone

get out of our lives, don't even phone

Stand there smiling & call it a career

on the issues you are clear

only talent you have is for campaign

at our expense have much to gain

Power & wealth you desire

in your soul a consuming fire

it's made you loose your mind

do your job as defined

Take Part

*What's wrong with liberalism, everything
it's all about power, being a king
repeat the lie the masses convince
got your ideas reading The Prince*

*Don't forget Marx
that old dog still barks
denying the nature of man
totally ruinous plan*

*Our revolution left politics behind
freedom will not be undermined
real power is found in the marketplace
opportunity & freedom we embrace*

*All we do is take part
use our brains, our backs, our heart
we can't help but get ahead
liberals like standing in line for bread*

Ben Said

*The buck stops there
the economy stupid, what do I care
socialism is my God
let things grind to a halt, I applaud*

Nero played fiddle

*Obama pretends to be in the middle
America is burning now
blame anyone, Tea Party, Mrs O'Leary's cow*

*Tea Party caused this downgrade
spending & debt that is not paid
have nothing to do with the deficit
hope & change is what we get*

*Capitalism is the problem my friend
only compromise & government will mend
this inequality no sane man can want
the words of Franklin suddenly haunt*

*"If you can keep it" Ben said it all
he saw the potential for our fall
representative republic, democracy
demand that you stand tall & free*

Compromise

*The art of politics is said to be compromise
once again the ignorant telling lies
to govern means you lead
not plant evil seed*

*It's not government's job to help the poor
as the border they ignore
it's not health care or pensions or to medicate
destroying the freedom that made us great*

*Time to follow the rule of law
the Constitution is not at flaw
individual freedom is divine, from God
our leaders responsibilities are specific not broad*

*America examine your roots, reflect
our representatives are only allowed to protect
they regulate our lives & interfere
destroying the freedom we hold so dear*

*Compromise means to undermine
broken, useless, a failed design
freedom or change, you can't have both
politics should be about principal, they swore an oath*

Principals

*Shades of gray, that's life
bet your life's full of strife
fact is, there is right & wrong
you're either weak, or strong*

*When weak you compromise
turn your eyes, from the prize
listen closely this isn't the news
in life you either win or loose*

*There's no such thing as a little free
so we stood up for ourselves & tossed the tea
the Deceleration of Independence & Valley Forge
somewhere I hear laughter, sounds like King George*

*Our Constitution's no living document
that's an evil & ludicrous argument
made by reprobates & the irresponsible
we're free by God because we stood on principal*

Ya-bit

*The ya-bit is a deadly beast
things full of life suddenly deceased
every project shot full of holes
the ya-bit kills all your goals*

*Ya-bit this could happen or ya-bit that wont work
with a superior attitude & crooked smirk
with a ya-bit around nothing get's done
no project, no work, not even fun*

*So if you find a ya-bit ready to strike
just tell em to take a hike
lacking positive thought & oh so rude
offering only platitude*

*Can't be done, it wont fly
ain't gonna happen don't even try
before you start may as well quit
if you listen to the ya-bit*

Mr Levin

*There's really no such thing as a "soft tyranny"
your either a slave or your free
freedom means you choose
or all your freedoms loose*

*Do you need a permit to run a store
there goes freedom out the door
does government constantly regulate
every aspect of commerce manipulate*

*Your not as free as you think
the chains are coming in a blink
you're taken in by everyone's lies
once you believe in compromise*

*Government's job is to protect
not winner & looser select
crash the market destroy peoples lives
bureaucrats now decide who survives*

*Saw a family in the park yesterday
holding hands in desperation pray
no job, now homeless, their only hope, God*

Mr Levin soft tyranny is but a step on the road we trod

Peter & Paul

*When you rob Peter to pay Paul you get Paul's vote
those big donors agendas you naturally promote
we the people can go to hell in the land of politics
professional politicians, a bunch of lying pricks*

*Term limits are our only hope, for change that's real
take a look at Harry Reed who only knows how to steal
government's a bloated pig because of fools like him
opportunity for the common man sadly looks quite grim*

*Union bosses abusing power don't help the working man
outlaw union dues it seems a better plan
I now see families on the street homeless destitute
the elderly begging for food, the children now prostitute*

*If you want to help the poor, stop taxing the rich
land of the free home of the brave, driven into the ditch
all my life I've been proud to call America home
end the politicians reign, before we end up like Rome*

Earn

*Illegally with law steal the wealth
in supreme irony care for our health
liars & thieves yourselves represent
abundance by government totally spent*

*Land of opportunity seeks equality
matters not that before God we're free
you tax every breath
regulate us to death*

*Heaven protect us from the E P A
bureaucrats, the political knave
representatives who manipulate
before they kill the freedom that made us great*

*We believe in God & our fellow man
the Constitution an inspired plan
dream work & learn
no one has a right to what we earn*

Who Is

*Who is John Galt, John Galt is inside you & me
in the heart of each man that's free
the apprentice the master those who work
finally get tired of the entitlement jerk*

*Creators of wealth simply walk away
the productive at some point refuse to pay
for the takers who do not create
no surprise it's more than fate*

*Collapse is what entitlement brings
revolution the offspring of Kings
freedom is the birthright of man
destruction follows social plan*

*When achievement is portrayed as greed
you kill mans desire to succeed
opportunity will most certainly halt
meet John Galt*

Ignored

*You can believe in government or in people
go to a Synagog or a Church with a steeple
but if you believe in Jihad, your dead
your not using your heart or your head*

*Have you been fed intolerant lies
do you kill children, the virgin cries
you'll have your reward I'm sure
there's a holy place for those who are pure*

*Holy hell the Heavens scream
evil deeds do not redeem
you with all that blood on your hands
flowing eternally, slowing the sands*

*Suffering is what you reap
Heaven is for those you made weep
truly you shall have your reward
God is forgiveness & love you'll be ignored*

Mischief

*Steal your money & mischief create
nature of man or simple fate
follow the money, the job of a con
America are you feeling put upon*

*Their job's to promote commerce not regulate
their right to tax income is the debate
our freedom is the greater good
the politicians role is misunderstood*

*One of many who now reflect
the role of government is solely to protect
America invaded by Washington
by the legislators who want your gun*

*Jobless recovery, recipe for revolution
destroy peoples lives find retribution
bloodless no doubt but the politicians will pay
this is America people have their say*

New Poor

*Why is government taking care of the poor
work real hard, the new poor have more
welfare check, who needs a job
I ain't no slob*

*Don't mind helping needy folk
but with Uncle Sam it's become a joke
if your healthy you need to work
live off others like some kind of jerk*

*Not my job to raise your kids
glad to help old folk & invalids
we the people are always best
at compassion & caring for the dispossessed*

*Uncle Sam you go too far
the poor in the projects drive a brand new car
& sit on their ass all day
& on their X Box video games play*

Bureaucrats

*Government's five times too big
bureaucrats find a new gig
had all we can take, so have you
your through*

*Get off the back of your fellow man
dirty blood suckers no positive plan
your a disease
so please*

*Collect garbage or go pump gas
selling shoes has more class
than being a parasite
I write*

*My children are not going to pay your pension
fired without severance did I mention
stop being an unproductive jerk
for God's sake go find real work*

Perceives

*Government's the problem not the solution
economy, medicine, schooling, pollution
America belongs to the individual
representatives regulate, manipulate, strangle & kill*

*When life gives you lemons make lemonade
set up a stand & you'll get paid
no now the city will give you a ticket
where's your license you need a permit*

*Toss the bums out close em down
house, senate, the judges, the clown
we the people no longer amused
now see the problem no longer confused*

*Can't fool us all, all the time
your fired is how you pay for this crime
the majority now perceives
your all just a bunch of thieves*

*Local government is also to blame
big fish small pond same game
cut the purse strings to get free
this nation belongs to you & me*

Less Is More

*First you must realize - they got it right
freedom a God given birthright*

*to the individual was power given
the engine of excellence finally driven*

*Never before in the History of Man
has there been such a wonderful plan
government doesn't rule your life
job of the wife*

*Founding fathers knew about free
abundance happens with liberty
I have freedom keep the change
enchanted by socialism, strange*

*Pile up unconstitutional debt
regulations & taxes, you're the threat
I don't fear invasion now
representatives steal our freedom, you know how*

*Get out of our lives find a useful career
honor the Constitution don't interfere
the wealthiest nation on earth you make poor
Founding Fathers knew, less government is more*

The Way

*Ain't just about you, but what you do
the example you set, not what you get
the inheritance you pass on, lingers long after your gone
is passed on again, so I use my pen*

*Do you bequeath, as you lie beneath
the soil, after your toil
or do you rot, lived for naught
but self, no books on your shelf*

*The sacred profane, lie there in vain
unless you give, you don't really live
not in this life alone, seeds are sown
for good or bad, mom & dad*

*Your kids shed a tear or do memories cheer
wish you well, in heaven or hell
yes we pass on, so soon gone
did you just play, or show the way*

Follow

People, say what's the use

they swear a vow, next the abuse

Constitution - a living document

get with the program the money's spent

Antiquated laws protect liberty

America no longer the land of the free

regulations bind & taxes enslave

Constitution's in the grave

Consume half our wealth in your lust for power

"if you can keep it" Ben Franklin's hour

you violate your oath by your very size

stop spending our money & telling your lies

Your only job, defend the border

not create a utopian social order

forget about education, healthcare, welfare even pollution

do nothing but follow the Constitution
